

In my opinion year 7 is a little scary at the start but you make loads of friends and get to know the teachers really well. The teachers help you a lot and they encourage you to do your best. I loved the start of year 7; it was like a journey that I had never started before and a journey that would never end. Good luck on starting year 7!

The teachers are funny and kind. There is a fair way of working in the learning groups. I also really liked making new friends with people I hadn't met before.

I have enjoyed making new friends in my learning group and my form and outside of school too. I also like the reward system at North Cestrian as it rewards you as an individual for good work and I like to watch my achievement marks keep going up.

The reason why I like this school is that even though I thought I wasn't going to fit in, my form tutor and all my teachers made me realise that I fit in in my own way. I have made lots of friends but still talk to the ones I had from primary too. My teachers will always explain something to me even if the rest of the class get it. They are really nice when it comes to exams too as they give us plenty of time to revise for the tests. These are some reasons why I think this school is really good.

There is a really good discipline level so things are fair.

All the teachers are really friendly from the start and also through the whole year.

It's fine if you are worried or scared because we all are when we start something new that we haven't done before. Sometimes it is necessary to do something that is scary to help you grow.

Here's what some of our current Year 7 pupils think about North Cestrian School.....

The teachers are really friendly and understanding.

I've enjoyed being more independent in sorting out work and being able to do some of it my in own style.

The food in the canteen is really nice!

If the teachers are here to help if you are worried and everyone is very helpful.

If you're struggling don't give up because teachers will encourage you and help you.

Teachers helped at the start of the year, telling us what to do. They explained how to do new things until we understood and after a while we got used to the new things. I also liked making new friends which I did in form and lessons and also in clubs. I joined football, rugby and basketball which were a lot of fun.

Form is really fun as we complete booklets on topics. Also, students who want to can take turns presenting information on the current topic and leading the discussion.

I also liked the activities outside of lessons and sang in the choir for the Christmas Carol Service.
